## SRS reports

**School:** Sample school

**Class/Group:** Class 1

**Section:** A, B, C

**No. of pupils:** 30

---

The following pages gives the results achieved by your group. The report is in three sections.

### Section A - Comparison of group and national SAS mean scores

The table shows the average Standard Age Scores (SAS) scores and the standard deviations. A SAS comes from comparing a pupil's raw score with the national standardisation sample, taking chronological age into account. This shows how each pupil is performing compared to the national average for their age. The national average SAS is 100. The chart shows the average SAS scores for the test with 90% confidence bands indicated by the vertical lines. If the vertical line overlaps the national '100' line the results for your group do not differ significantly from the national average.

### Section B - Pupils' SRS scores with Key Stage 3 indicators listed by First name

Scores for each pupil are shown as a Standard Age Score, a Stanine, a National Percentile Rank, a Group Rank, a Raw Score and a Reading Age. Indicators of the pupils' current and end of Key Stage levels in English are also shown. Some of the levels are split into three categories (C,B and A) with A denoting the highest and C the lowest category within a level.

SASs cover a wide range (from 60- to 140+) and this range can be subdivided into nine standard bands called stanines (from 'standard nines') which some people find are a convenient shorthand form of SAS. It should be remembered that some detail has been lost in grouping the scores into Stanines; SASs are a more precise measure.

National Percentile Rank can help you assess your pupils in the context of the national picture. For example, a pupil achieving an NPR of 60 has a higher SAS than 60% of pupils in the standardisation sample (or, equivalently, 40% of pupils in the standardisation sample had an SAS higher than or equal to that of a pupil whose NPR is 60). Group Rank indicates a pupil's position relative only to the other pupils in your class/group, ranked according to SAS for each battery, or mean SAS (for example, 3rd out of 30).

### Section C - Pupils' SRS scores on individual questions

Scores on individual questions (1=correct, 0=wrong, blank= not attempted) are shown together with the total raw score and the total number of questions attempted.

## Section A - nferNelson Suffolk Reading Scale 2

**School:** Sample school

**Group:** Class 1

**No. pupils:** 30

### Comparison of group and national Standard Age Scores

	Mean Age (yrs:mths)	Number of Pupils	Standard Age Score	
			Mean Score	Standard Deviation
<b>Boys</b>	12:1	12	100.6	15.1
<b>Girls</b>	12:0	18	97.4	16.4
<b>All Pupils</b>	12:0	30	98.7	15.7
<b>National</b>			100.0	15.0

**Notes:**

1. The mean standard age score for this group is not significantly different from the national average.
2. The spread of scores for this group is not significantly different from the national spread of scores.
3. The mean standard age score for boys is not significantly different from girls.

### Comparison of School and National Standard Age Score Distributions

	<74	74-81	82-88	89-96	97-103	104-111	112-118	119-126	>126
<b>Boys</b>	8%	0%	25%	8%	8%	25%	8%	17%	0%
<b>Girls</b>	11%	6%	11%	17%	28%	11%	6%	0%	11%
<b>All Pupils</b>	10%	3%	17%	13%	20%	17%	7%	7%	7%
<b>National</b>	4%	7%	12%	17%	20%	17%	12%	7%	4%
