Monitor progress

Track progress in science year-on-year

Personalise learning

Make use of invaluable data about pupils' strengths and weaknesses

Benchmarking

Benchmark attainment against peers nationally

Progress Test in Science (PTS) enables you to monitor science achievement benchmarked against peers nationally, as well as measuring the key National Curriculum requirement of 'working scientifically'.

Why use Progress Test in Science?

- Support groups and individuals to succeed with accurate information about their strengths and weaknesses
- Identify needs for additional support or extension work
- Benchmark attainment against peers nationally
- Monitor progress in science year-on-year
- Evaluate teaching and learning strategies
- Communicate with parents and other stakeholders

For secondary schools, the transition test (Level 11T) enables you to benchmark current pupil performance on entry in Year 7 - and monitor any subsequent progress against it. Even if pupils have already been tested at the end of Year 6, it enables you to re-assess pupils on entry to secondary with new content - taking account of the 'Summer Dip' effect.

A better prediction of Attainment 8

PTS provides secondary schools teachers with an early predictor for Attainment 8, replacing KS2 indicators. Detailed sample reports and analysis provide evidence for Ofsted that all pupils are on track to meet expectations.

PTS is part of the Progress Test Series along with English and maths and is an ideal assessment for reliable progress tracking and national benchmarking with new content to match the new National Curriculum.

Quick reference guide

Age range: 7-14 years

Suitable for: Teachers, Science Co-ordinators and SENCOs

Test duration: Approx. 60 minutes

Format: Digital/Paper
