

YOUR TRAINING JOURNEY

We provide a comprehensive package of **training and support to all customers.**

Depending on your assessment package, face-to-face training may be available at an additional cost.

Please contact the **Training team** to discuss what is available for you.

Getting to know your assessments

-  Testwise and TRS training
-  Whole Pupil View (or individual assessment) introduction

Testing

-  **Online webinars**
(free access to customer support seminars and webinars)
-  **E-learning support videos**
(bite sized modules covering all aspects of the assessments from basic administration, to the format of reporting)

Understanding the data

-  Regional Assessment Workshops
-  Whole Pupil View A&I workshop (in-school)
-  Cluster report training (for trusts)

What do the options involve?

Whole Pupil View Introduction:

- A session to introduce the WPV and the suite of assessments that create it, from what the assessments are to what they can do to support and enhance your work with your students.

Regional Assessment Workshops:

- Modules focussing on:
 - CAT4®
 - Progress Test Series®
 - NGRT® & NGST®
 - PASS®
 - KR Surveys®
- In each module strategies are explored for complete understanding and best use of your data to support your students.
- You will be applying the strategies to your data so you will need to bring it along.

Whole Pupil View Analysis & Interpretation Workshop:

- This session helps you consider the next steps for the best use of your Complete Digital Solution® assessment data
- You will be referencing your school data on a number of your students chosen by you. During the session the data is triangulated to illustrate creating a Whole Pupil View to better understand the strengths and needs of your students.

Cluster report training:

- This session aims to support MATs, groups and clusters in understanding what is available in the cross trust report, the data included and possible Trust implications.
